

## **Come, Stay With Me Tonight**

I see in dreams the way you look tonight,  
hold you now the way I used to do;  
though nothing now is right,  
come stay with me tonight.  
*I'll turn the lights down low,  
and hold you in my arms,  
remembering the moments we have known.  
I'll kiss away the pain,  
love you once again,  
if you stay with me tonight —  
if only you will stay with me tonight.  
If only you will stay with me;  
stay with me.  
Let us be the way we were once more.  
Yes, let us be the way we were once more.  
Come, stay with me tonight.*

If I could only turn the page again,  
Find some way to take away this pain;  
It surely must be right,  
Come, stay with me tonight,  
*I'll turn the lights down low,  
and hold you in my arms,  
remembering the moments we have known.  
I'll kiss away the pain,  
love you once again,  
if you stay with me tonight —  
if only you will stay with me tonight.  
If only you will stay with me;  
stay with me.  
Let us be the way we were once more.  
Yes, let us be the way we were once more.  
Come, stay with me tonight.*

If we could all the missing years erase,  
prove it's more than just a passing phase.  
We'll change the dark for light,  
Come stay with me tonight,  
*I'll turn the lights down low,  
and hold you in my arms,  
remembering the moments we have known.  
I'll kiss away the pain,  
love you once again,  
if you stay with me tonight —  
if only you will stay with me tonight.*
